## 검색 정보 목록

# Search Page in Journals@Ovid (Basic Search)

The screenshot shows the Journals@Ovid search interface. At the top, there is a navigation bar with links for Search, Journals, Books, Multimedia, My Workspace, Links, EBP Tools, and What's New. Below this is a Search History section. The main content area is titled "Basic Search" and includes links for Find Citation, Search Fields, Advanced Search, and Multi-Field Search. It shows that 2 resources are selected. The search term "leg bone" is entered in the search box, and the "Search" button is visible. A "Limits" dropdown menu is open, showing various filter options. The "Include Related Terms" checkbox is checked and highlighted with a red box. Other filters include "Include Multimedia", "Articles with Abstracts", "APA PsycArticles", "Daily Update", "Original Articles", "Ovid Full Text Available", and "Review Articles". There are also "Additional Limits" and "Edit Limits" buttons.

# Search Page in Journals@Ovid (Basic Search)

The screenshot displays the Journals@Ovid search results page. The search term is 'stroke', resulting in 31,469 text results. The search results are listed in a table with columns for relevance (stars), title, authors, journal, and actions. A sidebar on the left contains search information and filter options. A red box highlights the 'Filter By' section, which includes options for 'Relevancy', 'Years', 'Journal', and 'Publication Type'. A pink callout box points to the 'Filter By' section with the text: '연관성 출판연도 저널명 출판물 유형 에 따라 필터링 가능' (Filtering possible by relevance, publication year, journal name, and publication type).

Online date: February 12, 2021

I am a third-year orthopaedic resident. At the end of December 2020, I received my first dose of the COVID-19 vaccine. The entire experience was designed time to the designated location within my health-care institution, and received my shot. In standard 21st century fashion, I was asked if I wanted my photo taken while receiving the vaccine.

초록 및 HTML에서 원문 보기

After receiving the vaccine, I was ushered to an auditorium where I was instructed to sit for 15 minutes to ensure that I did not experience any immediate negative effects. Surprisingly, previous memories of the scattered and socially distanced crowd of fresh vaccine recipients. Soothing music played over the auditorium speakers.

I reflected.

I thought about the preceding 10 months, including those early days of the pandemic when just walking into the hospital felt like stepping into an all-too-uncertain and high-stakes experiment. I remembered the colleague with whom I had graduated from medical school in 2018. A father of 3, he was one of the first American health-care workers claimed by COVID-19. I thought about my wife's grandmother. Although she did not pass away from COVID-19 itself, she spent her final months without visitors in an assisted-living facility and was alone in a hospital room for most of her final hours because of COVID-19-related distancing regulations. I remembered a frail yet otherwise healthy patient whom I had admitted because of a hip fracture. Following her treatment and hospital stay, she had been discharged to a rehabilitation facility. Two weeks later, she was readmitted to our hospital, having contracted COVID-19. Sadly, she succumbed to the virus. I recalled feelings of fear and uncertainty when encountering my first operative case in which the patient was confirmed to be COVID-19-positive, with strict attention to all of the accompanying protocols required. Now, as the pandemic has continued, our protocols and precautions have become all too familiar. Above all, I contemplated the virtually unfathomable number of fatalities, which now total >400,000 and counting in the U.S. alone.<sup>2</sup>

As surgeons, we excel through a certain amount of disassociation and suppression of our feelings. How else could we reduce a fracture in the emergency department or cut into someone in the operating room without being crippled by our emotions? But in those 15 minutes that I waited after receiving the vaccine, I recognized that the ease with which I had received the shot was in stark contrast to so much pain worldwide. All of my suppressed emotions from the previous 10 months flooded to the surface: frustration, anger, and sadness over the virus, its toll, and its pervasive impact on all of our lives, but also pride, wonder, and gratitude at the responses of the science and health-care communities to the virus.

When the 15 minutes were up, I left the auditorium, the soothing music fading as I walked away. I returned to my duties in the operating room and assisted with a periacetabular osteotomy.

What's Important: Widespread Vaccination

Reflections on the Pandemic, Contracting COVID-19, and the Opportunity Before Us

Alexander M. Crawford, MD

I am a third-year orthopaedic resident. At the end of December 2020, I received my first dose of the COVID-19 vaccine. The entire experience was oddly routine. I made an appointment via email, showed up at the assigned time to the designated location within my health-care institution, and received my shot. In standard 21st century fashion, I was asked if I wanted my photo taken while receiving my vaccine, to which I readily replied yes. After all, it felt like an historic moment.

After receiving the vaccine, I was ushered to an auditorium where I was instructed to sit for 15 minutes to ensure that I did not experience any immediate negative effects. Supervising providers watched over the scattered and socially distanced crowd of fresh vaccine recipients. Soothing music played over the auditorium speakers.

I reflected.

I thought about the preceding 10 months, including those early days of the pandemic when just walking into the hospital felt like stepping into an all-too-uncertain and high-

Sadly, she succumbed to the virus. The screenshot shows the OvidSP website interface. At the top left is the Ovid logo. The top right corner features the Wolters Kluwer logo and a navigation menu with links for My Account, My PayPerView, Ask a Librarian, Support & Training, Help, Feedback, and Logoff. The Logoff link is highlighted with a red box. Below the navigation bar is a blue header with tabs for Search, Journals, Books, Multimedia, My Workspace, Links, EBP Tools, and What's New. The main content area is titled "Journals A-Z" and displays a list of journals. A callout box with a pink background and rounded corners contains the Korean text: "동시 사용자 제한이 있기 때문에 사용 후 반드시 Logoff 권장" (Due to simultaneous user restrictions, it is recommended to log off after use). The journal list includes titles such as "25+ Business Development & Innovation Opportunities in Antibacterials Emerging Opportunities to 2010" and "25+ Business Development & Innovation Opportunities in Antivirals Emerging Opportunities to 2010".
